---

## What is Belbien?

Belbien is a prescription medication often used to treat moderate to severe pain. It contains an opioid component that works by interacting with the central nervous system to reduce pain perception.

-

## Belbien Usage / Dosage Table

Condition	Typical Adult Dose	Frequency	Notes
Moderate Pain	50–100 mg	Every 4–6 hours as needed	Do not exceed <b>400 mg/day</b>
Severe Pain	100–150 mg	Every 6 hours	Use only under medical supervision
Elderly / Sensitive Patients	25–50 mg	Every 6–8 hours	Adjust dosage based on tolerance

 Always follow your healthcare provider's instructions. Dosage may vary depending on medical conditions, age, and other medications.
